The Columbus Pharmacy recommends its complete line of rubber goods at moderate prices. Every piece is guaranteed for one year. It will pay you to investigate.

The band concert in the park last evening drew out a large crowd, but before the concert was over the electrical storm had driven most of the people home.

T. J. Gannon of Smith & Cummings' market and E. Prestini of H. J. Smith's market were initiated into the clerk's union at the meeting held last evening. One application for membership was also received.

Yes, that is where you want to go—Ford & Beckley's studio, over Kendrick's drug store. The light is right. Come up and see. All kinds of photographic work done to order. They get your work out quick, too.

If you want a perfect shaving outfit, call at Reynolds & Son on Thursday, Friday or Saturday and see the Durham Duplex safety razor, which is being demonstrated by a representative from the New York office. These razors are fully guaranteed.

At the instance of the city council, an order issued Tuesday night, City Engineer George A. Reed has caused to be inserted in The Engineering News an advertisement calling for bids on the proposed change in the course of Stevens branch. The Engineering News is a trade journal published every Thursday in New York City. The contract will include the work of changing the course of the river from a present length of 1,300 feet to a length of 600 feet. The contract also must specify the erection of granite walls at the sides, filling up the old bed, removing bridges and building culverts. It is thought that bids will begin to come in soon, and it is the intention of the city council to award the contract on August 11, when the bids will be opened. As soon as it is decided who will take charge of the project, work will be commenced and pushed rapidly forward, until its expected completion in the fall. It will take a short time for the contractor to perfect his plans for the work; but as soon as this is finished laborers will be on the spot to commence operations.

The Auto Gun club had a good attendance at its regular shoot at the traps on the Shepard farm yesterday afternoon, there being several beginners among the shooters. Frank Adams led the list yesterday, with a fine score of 43 out of a possible 50. Other scores were: D. G. Barclay, 77 out of 100; I. O. Wales, 22 out of 50; E. S. Shepard, 56 out of 100; W. H. Ward, 39 out of 75; O. C. Russell, 18 out of 25; F. C. Eaton, 29 out of 25; C. R. Wood, 13 out of 25.

Bridge foreman Wahlen of the Montpelier & Wells River railroad arrived in the city yesterday afternoon, with a trainload of timber and a gang of bridge-builders, to work on the new water tower located at the Summit, so called, at Websterville. The foundation of concrete and cement has been completed for the structure, and the erection of the tank will begin at once and, it is expected, will be finished within a week or ten days at the latest. The dimensions of the tank will coincide with others built by the company, the diameter being 12 feet and the height 12 feet. The addition of this facility at Websterville will do away with necessity of relying upon the quarries or the switch-back for water. On completion of the tower, work on a foundation for a similar structure at Graniteville will be commenced. While waiting for the commencement work to be finished, the bridge gang will be employed in overhauling the bridges on the road. With the beginning of winter, the railroad expects to have perfect watering facilities for all of its trains.

The addition of this facility at Websterville will do away with necessity of relying upon the quarries or the switch-back for water. On completion of the tower, work on a foundation for a similar structure at Graniteville will be commenced. While waiting for the commencement work to be finished, the bridge gang will be employed in overhauling the bridges on the road. With the beginning of winter, the railroad expects to have perfect watering facilities for all of its trains.

Bridge foreman Wahlen of the Montpelier & Wells River railroad arrived in the city yesterday afternoon, with a trainload of timber and a gang of bridge-builders, to work on the new water tower located at the Summit, so called, at Websterville. The foundation of concrete and cement has been completed for the structure, and the erection of the tank will begin at once and, it is expected, will be finished within a week or ten days at the latest. The dimensions of the tank will coincide with others built by the company, the diameter being 12 feet and the height 12 feet. The addition of this facility at Websterville will do away with necessity of relying upon the quarries or the switch-back for water.
